Fullstack Developer

I am a fullstack developer proficient in Flutter and Laravel, with practical experience in creating and maintaining cross-platform applications and APIs. I currently work with C# and Javascript, using EFCore, Vue, and SQL, developing applications for service and customer relationship management with chat functionalities. I also have experience with SQL databases, Figma for design creation, Next.js for frontend projects, and Python for data analysis.

Education

Elementary and High School - Colégio Dehon, 2007-2017

Associate Degree in Systems Analysis and Development - IFSC, 2024 - 2026

Key subjects: Systems Analysis, Systems Design, Object-Oriented Programming Practices, Software Testing, Databases, Human-Computer Interaction
